COVERED**

**Crop Baling  
Catalogue 2022**

## **OUR STORY**

Back in 1950, we first planted small seeds with big dreams. As the years went by, we nurtured them with love and care on our small farm... Now they have grown and yield cutting-edge, premium products, top quality service and an uncompromising supply chain that brings Farm Grown Solutions to each and every one of our customers around the world, so that we can continue to grow together.

**At Tama, we've got you covered – from protecting your crops to ensuring reliable and consistent baling – giving you one less thing to worry about.**

Leveraging over 70 years of agricultural and manufacturing expertise and experience, Tama is more than just a provider of high-quality crop baling products.

As farmers, we understand your concerns and offer Tama+ our range of world-leading, crop baling solutions. When the time comes to focus on baling, we accompany you throughout the process – from selecting the right product, through facilitating non-stop, trouble-free baling, to maximizing performance.

By choosing Tama, you enjoy not only leading products and solutions, but also peace of mind, enabling you to focus on what you do best – being a professional farmer.

# HAVE YOU CLAIMED YOUR TAMA REWARDS?

SHOP

EARN POINTS

GET REWARDED

[www.TamaRewards.com.au](http://www.TamaRewards.com.au)

Quality baling deserves rewarding.  
You're invited to join the first of its kind rewards club  
for the Australian fodder preserving community.

Tama Rewards is **YOUR REWARD.**

## EARN POINTS

- Simply purchase over \$5000 on Tama crop baling products in one transaction (each season) to qualify for Tama rewards.
- Your first \$5000 will earn you 50 points.
- After your initial \$5000 claim, every invoice over \$1000 are eligible for points.

## USE POINTS

Collect your points and choose from thousands of amazing rewards including sporting goods, electronics and gift cards.

## THE NITTY GRITTY

- A valid invoice must be attached to your claim to be eligible for points.
- Tama rewards 'season' runs from July to June.
- Each season you must reactivate your Tama rewards membership by spending over \$5000 in one transaction.
- Points expire after 24 months from date of submission claim.

# How it works

**1.** Registers online at [www.TamaRewards.com.au](http://www.TamaRewards.com.au)

**2.** Upload your invoice of over \$5000 in one transaction to activate account.

**3.** Every subsequent invoice over \$1,000 is eligible for points!

**4.** Claim points on rewards!

# TOGETHER WE GROW FOR CHANGE

## Our commitment to the environment

Sustainability has never been more critical than it is today.

Farmers and contractors want to meet their environmental obligations by reducing the impact of plastics on the farmed environment. Tama is leading the way.

Just like you, Tama is committed to the sustainability of agricultural practices, ensuring on-farm productivity is maximised whilst minimising our environmental impact.

### Tama Netwrap and Twine reduce the amount of plastic used per bale

Tama is committed to reducing the amount of plastic used in our manufactured products, whilst maintaining and even improving the performance of our Crop Baling Solutions.

### We are increasing the Re-use of recycled raw materials coming from 3 sources:

1. All waste materials from all Tama production sites.
2. Recycled raw materials made from products which are NOT used for crop baling
3. Recycled raw materials made from recycled crop baling products. PCR = Post Consumer Recycled materials

## REPLACE

Investing in innovative technologies that will enable alternative plastic-free solutions for the crop baling industry.

## COLLECT

Together we aim to maximize the recycling of Agri-plastics after they have been used in the field. Tama Group is proud to support a multitude of collection schemes around the world, which collect and recycle plastic from the field:

**Join us in our efforts to strive for change!**

# TamaCycle

A FIRST-OF-ITS-KIND  
ECOLOGICAL SOLUTION  
FOR CROP BALING  
PRODUCTS

## Tama Cycle Netwrap

This high performance netwrap is the latest step in our eco-baling revolution. By replacing virgin resources with recycled and reprocessed materials, Tama offers a first of its kind ecological solution for crop baling products.

After revolutionising the baling industry by producing premium netwrap with much longer rolls and using less plastic per bale compared to other brands in the market, Tama is now taking a further step in its environmental revolution.

# COMING SOON

## Recycled to the core!

Everything about Tama Cycle Netwrap offers a high percentage of recycled material:

# ROYALTY IS COMING TO THE FIELD

---

**High density cereal and straw crops and heavy-duty baling have always required at least 4-5 wraps, or even more... until now.**

---

**Introducing: TamaNet+ Royal™. 70 Years of innovative farming solutions brought to life with a first of its kind baling experience - Only 2.5\* wraps per bale!**

**A CLASS ABOVE THE REST**

\* Based on field trials which were carried on high-density crops that are usually baled with 4-5 wraps per bale.

# TamaNet+ ROYAL 2.5 WRAPS PER BALE!

**26%**  
SAVED

## ULTRA COST EFFECTIVE!

Up to 26% saved on your costs per bale + enjoy over 50 bales more compared to the standard 3600m netwrap.

**40%**  
LESS

## FASTER THAN EVER!

Up to 40% less downtime - with an incredible, record-breaking 7.5 seconds of wrapping time per bale.

**45%**  
LESS

## LESS PLASTIC!

Up to 45% less plastic per bale - That's 1000m less plastic for every 100 bales!

## HEAVY DUTY BALING!

- Tailor-made for high density cereal crops
- Designed to withstand the highest pressure
- Crafted to enhance your performance

## ROYAL PERFORMANCE

TamaNet+ Royal™ carries Tama's ultimate guarantee for reliable and consistent baling with all baler types, under any conditions.

CODE	PRODUCT / BRAND	COLOUR	WIDTH / ROLL (M)	LENGTH / ROLL (M)	WEIGHT / ROLL (KG)	ROLLS / PALLET	BALES / ROLL
							HAY & STRAW 2.5 WRAPS
73357720	TamaRoyal™	Black & White	1.23	3,500	42.9	28	270

\* Based on 1.5m bale with 2.5 wraps.

## TamaNet+

### WE'VE GOT YOU COVERED

**With TamaNet+™ you get the security that you need and the peace of mind you deserve.**

Once the baling season begins, you need to be sure that your netwrap stays strong, from the day you wrap the bale, until the day it is used. TamaNet+ is recognised in Australia as the most reliable, trouble free netwrap available.

#### **RELIABILITY**

- The only Net 'Patented' Original EDGE TO EDGE™.
- Guaranteed against UV breakdown.
- Compatible with all round balers.
- Trialled and approved by all leading baler manufacturers.
- Our products' strength, length and all other measurements are annually checked and approved by DLG.

#### **CONSISTENCY**

- Perfect bales every time.
- Effective coverage in all weather conditions.
- Suitable for all crops.

## OUR LEADING TECHNOLOGY WORKS FOR YOU

### GUARANTEED MINIMUM LENGTH

Every roll contains the guaranteed stated length, not a "plus-or-minus" average.

### LIGHTER NETS

Easier to carry and handle.

### LONGER ROLLS

More bales per roll, less roll changes and greater efficiency.

### ENVIRONMENTALLY OPTIMIZED FORMULA

Each bale is wrapped with less plastic material to reduce the environmental impact.

### SUPERIOR GRIP IN ALL CONDITIONS

Ultimate connection between layers and strong tail security.

### MESH LOCK TECHNOLOGY

Eliminates the risk of net laddering.

\* Based on 1.2m bale for silage and 1.5m bale for hay and straw.

# NETWRAP

## BROAD BAND XL™

Ideal choice for silage and hay wrapping.

Broad band XL is the ideal choice for wrapping silage and hay crops. Broad band comes in two sizes, 1.23m and 1.3m to ensure it fits your specific baler. It is UV stabilised to ensure it won't perish in the tough Australian conditions. It is easy to use with red end warning and easy to lift carry handles.

- Suitable for wrapping silage and hay
- Excellent coverage
- Guaranteed minimum length.
- Universal. Fits in all balers
- UV stabilised for Australian conditions

## GREEN CAP™

Traditional and economical baling.

Piippo Green Cap NG - For all balers, with a high breaking strength. Piippo Green Cap comes with the basic features of netwraps, such as easy cutting and spreading.

- Suitable for wrapping standard weight silage and hay bales
- Excellent coverage
- Guaranteed minimum length.
- Universal. Fits in all balers
- UV stabilised for Australian conditions
- Tried and tested for 15 years in Australia

WHAT DO YOU NEED?

**BEST**

World leading technology.  
NON - STOP Baling

**BETTER**

**GOOD**

Original technology.  
Designed for older model balers  
Good for traditional baling methods

## HERCULES HD +™

Hercules HD+ is TAMA's premium bale twine. It is the longest and strongest bale twine in the Tama Australia range. It has a higher tensile strength and is 14% longer than standard Hercules HD twine, allowing for more time between spool changes. Maximise your payload with the strongest twine in the TAMA range.

- Premium quality and performance.
- Higher tensile strength than standard Hercules.
- Longer than standard Hercules twine by 14%.
- Developed for all high-density square balers.
- Guaranteed minimum length.
- More time between spool changes due to longer length.
- UV resistant for Australian conditions.

## HERCULES HD™

Hercules HD was developed in Australia to coincide with the launch of high density balers. Hercules HD quickly became the household name in this category for its reliability and strength, even in the toughest conditions.

If you're looking for a twine that will keep you baling, use what the professionals use - Hercules HD.

- Developed for high reliability and high knot strength.
- Professional Hay Contractors twine of choice.
- Made for tough Australian conditions.
- Long 1100m spools.
- 2 spools per pack.
- UV resistant for Australian conditions.

# TWINE TRIALS

*Did you know, every year, the Tama team head into paddocks across the country, trialing new crop baling products before they hit the Australian market?*

*Working alongside baling contractors and farmers, the product trials give Tama a unique understanding of the end-user challenges they may be facing and supports the Tama R&D team design products based on user feedback.*

*Recently appointed Tama Regional Technical Manager Darrell Butler says, "It's great to be able to see new products coming through the pipeline, from initial concept to launch. We are ensuring products are specifically designed for the Australian market, which has some of the harshest conditions in the world. It gives our team and our customers the trust that our product will work without issue."*

*With the largest twine trials in the Southern Hemisphere and thousands of large square bales pumped out every year, it's no wonder Tama is the preferred partner of crop baling solutions for fodder producers looking for performance and reliability at baling time.*

Regional Technical Manager Darrell Butler at Tama's 2022 twine trials.

## TROJAN PLUS™

Trojan Plus is a 1400m long twin pack, 27% longer than regular trojan twine, allowing for an extra 360 large square bales per pallet. Made for the professional contractor with quality in mind. Trojan plus minimises wear on baler parts due to its soft, low friction characteristics.

- 27% longer than regular Trojan.
- Excellent tensile strength and knot performance for large square baling.
- Low friction twine for reduced wear on baler parts.
- UV stabilised made for tough Australian conditions.
- Guaranteed minimum length.

## TITAN PLUS™

Titan Plus specifically developed for large square bales of up to 750kg, offers high strength and high performance. Twin spool pack of combined total length of 2800m to minimise time changing spools. Ideal to pair with Trojan Plus.

- Distinct blue and yellow colour twist.
- Excellent tensile strength and knot performance for large square baling.
- Low friction twine for reduced wear on baler parts.
- UV stabilised made for tough Australian conditions.
- Guaranteed minimum length.

# NON-STOP BALING

**Tama** 

# TWINE - SMALL SQUARE

## Premium Blue™

A premium quality twine designed for small square balers with medium to high density pressure. Designed in Australia for tough Australian conditions, perfect for no-nonsense, trouble-free baling.

- Bright blue colour for easy recognition.
- Long twine length (2200m).
- Comes in a twin pack (4400m).
- Perfect spool size, perfect for small square twine boxes.
- Minimum guaranteed length.
- UV stabilised for Australian conditions.

## Premium Gold™

A premium quality twine designed for small square balers with medium to high density pressure. Designed in Australia for tough Australian conditions, perfect for no-nonsense, trouble-free baling.

- Comes in gold for easy recognition.
- Long twine length (2200m).
- Comes in a twin pack (4400m).
- Perfect spool size, perfect for small square twine boxes.
- Minimum guaranteed length.
- UV stabilised for Australian conditions.

## Contractor Pink™

Perfect for small square baling

Reliable twine with a long Kinnears history. Contractor is perfect for general small square baling.

- Bright pink colour for excellent visibility on and off the bale.
- Perfect spool size, perfect for small square twine boxes.
- Minimum guaranteed length.
- UV stabilised for Australian conditions.

## Sisal 'BALER'

Sisal baler has been rot proofed for long term protection against fibre deterioration in the field. Used for small square bales.

- High strength natural baling twine for small square bales.
- Rot proof for long term protection.
- Free of knots for easy running in the baler.
- Perfectly spooled for minimal loose fibres to reduce build up in the knotters.
- Natural fibre.

61215020	Kinnears Sisal Baler	Green	2,700	2	48	516	24,768

## BIG ROLL PINK™

Big Roll is one of the longest serving baling twines sold in Australia, coming from the Kinnears family of twine. Big roll is the perfect twine for round bales when reliability and time efficiency is priority.

- High strength, ideal for tight compact bales.
- Bright pink, for clear visibility on and off the bales.
- Guaranteed minimum length.
- UV stabilised.

## Sisal 'SILAGE'

Round bale sisal silage twine is untreated bale twine, perfect for the round bales that are being wrapped and won't degrade your silage wrap.

- Use of round bales, under silage film.
- Non-reactive.
- A free-flowing sisal for easy application.
- Will not degrade the silage film.
- Long 5000m per pack, 2 spools per pack.

## Sisal 'BINDER'

Round bale sisal binder is treated with non-toxic oil to ensure a long-lasting twine that won't contaminate your silage.

- For use on round bales.
- Treated with non-toxic oil for long term weather protection.
- Natural fibre colour.
- Twin packs, long 4400m total length.

61232020	Kinnears Sisal Binder	Natural	4,400	2	48

# FODDER PRESERVATIVE

Made from a combination of sulphur compounds, HAY GUARD enables you to start baling within a few days instead of waiting 4-6 weeks. Unlike proionic acid products, HAY GUARD has no odor.

Once applied to the cut hay, HAY GUARD turns into gas and searches for oxygen then it 'eats' up the oxygen in the bale, prohibiting microbial growth so the bales will stay cooler, and you'll see less browning.

- Ready to use formula
- Baling up to 25% moisture
- HAY GUARD® is a preservative not an inoculant
- The sulphur salts form mild s-gases that are non-conductive to mould growth
- Non-toxic
- No withholding period
- Safe, based on additives used in human food preservation
- Get hay baled before rain event
- More baling hours in a day
- Start hay making earlier in the season
- Better quality hay and more regrowth
- Reduce heat, yeast and mould
- Increase dry matter recovery
- Retain more high-quality nutrients
- Easier feeding out

CODE	DESCRIPTION	LITRES	KILOS	PALLET QTY
97020211	Pail	20	25	32
97020212	Barrell	200	250	4
97020213	IBC	1,200	1,500	1

## DID YOU KNOW

Mould and Fungus are naturally present in hay. As soon as forage is cut, the dynamic of microbe colonies change from defensive bacteria (helping the plant grow) to degenerative organisms, that feed off the energy plants cells emit as they start to decompose. Extended drying times in windrows are perfect conditions for bacteria and fungus colonies to establish themselves before baling, and if baled at a higher moisture without HAY GUARD®, colonies continue to feed off the water soluble carbohydrates and heating can occur.

# How it works

HAY GUARD®'s dual action protects and retains the quality of your hay.

- Low oxygen and no mould growth produce a more stable bale and much less heating even when moisture is higher.
- HAY GUARD® helps limit plant cell respiration.

## Application Rate

**Standard Moisture (average conditions) RATE 800ml/tonne**

FORAGE TYPE	UNIT SIZE	UNITS PER PALLET	800ML/TONNE TREATS:					
			1 UNIT			PALLET		
			TONNES	400KG ROUND BALES	500KG SQUARE BALES	TONNES	400KG ROUND BALES	500KG SQUARE BALES
Hay	20 L	32	25	63	50	800	2,000	1,600
	200 L	4	250	625	500	1,000	2,500	2,000
	1,200 L	1	1,500	3,750	3,000	1,500	3,750	3,000

### NOTE:

- Apply 800ml when baling hay using an applicator on the baler.
- Moisture content should be 25% or less for cured hay, 18% or less for sap/stem moisture.
- The recommended way to measure the moisture is Gazeeka 870 or before baling use the microwave oven technique.
- Refer to application rate on drum label for more details.
- **Application rates depend on a case by case scenario. Speak with your local Tama Territory Manager for suitable application rates for your crop and conditions.**

## TRIOWRAP loop™

### EFFICIENT & SUSTAINABLE SILAGE MAKING IS HERE

TRIOWRAP LOOP™ offers the same great performance that you've come to know and love and made from the same mechanical properties as the original Trio wrap, with the added benefits of being the first bale wrap on the market that is made from 30% recycled material.

It is made from a multi-layered construction and a blend of multiple components to ensure long lasting film adhesion, up to 70% pre-stretch, off white colour, tear strength, UV protection and a smooth surface that is needed for a high-quality silage film.

**30%**  
RECYCLED  
CONTENT

**29%**  
REDUCTION  
CARBON  
FOOTPRINT

- TRIOWRAP LOOP is the first bale wrap in the market based on PCR material.
- Made from the same mechanical properties as the original TRIOWRAP.
- Same wrap performance and silage quality as the original TrioWrap.
- High pre stretch level of up to 70% - great for airtight wrapped bales with long lasting protection and best quality silage.
- Can be used on all types of balers.
- Contains 30% recycled content with a minimum 25% is PCR.
- Decreases the carbon footprint by 29%\*.
- Film and core are recyclable.

\* LCA modeled 2021 in SimaPro using data from the ecoinvent inventory database. Reduction in impact when comparing Triowrap loop 25 to Triowrap 25 virgin

# SILAGE WRAP - PROFESSIONAL

## Silotite PRO™

Silotite Pro is an advanced multi-layer stretch film which has been designed for professional users with high output combiwrappers. With an added 33% longer length per roll, Silotite Pro provides significant cost savings and adding time between roll changes.

The Pro film technology offers excellent puncture resistance and provides a better crop conservation due to an increased oxygen barrier as well as a smoother and less wrinkled film layers when applied to the bale.

**MAXIMUM  
BALES  
MAXIMUM  
QUALITY  
SILAGE**

**SILOTITE** Pro

- Improved oxygen barriers with greater resistance to oxygen penetration.
- Improved elasticity, 70% stretch on round bales.
- UV stabilised.
- Superior performance on complex and high-speed machinery.
- 33% more length over standard Silotite (2000m roll length).

### Pro Technology

SilotitePro is manufactured using the latest raw materials and advanced manufacturing techniques that enhance the essential characteristics of silage stretchfilm. As a pre-orientated film SilotitePro benefits from an enhanced oxygen barrier - critical to ensuring excellent crop conservation.

## Triowrap PLUS™

Trioplus is also available in Pink and Blue. Pink TRIOPLUS supports breast cancer research through the McGrath foundation and blue TRIOPLUS supports the RULE Prostate Cancer

- Same great performance, thinner film.
- 70% stretch on the bale.
- Longer length per roll than standard film.
- Better for the environment – more film per roll, less rolls, and boxes as waste.
- More film on roll= more time between changes.
- Available in 3 colours (Green, Pink and blue).
- Pink and Blue silage films support breast cancer and prostate cancer.
- 400m longer than TRIOWRAP.
- 73% more bales wrapped depending on meters used per bale.

In September 2021 The E J Whitten Foundation and the Australian Prostate Centre (APC) joined forces to build RULE Prostate Cancer to amplify the fight against prostate cancer.

The E J Whitten Foundation was established in 1995 in honour of the great Ted Whitten Senior who passed away from prostate cancer, and has raised over 15 million dollars for promoting men's health and prostate cancer research.

APC began as a research facility in 2012 collaborating with institutions around the world to advance the treatment of prostate cancer. In 2014 they opened the doors to their North Melbourne centre based in Melbourne's biomedical precinct.

Since then, APC have collaborated in vital research, continued to host the Asia Pacific conference for over 650 prostate cancer specialists and leaders, opened the APC Prostate Cancer Genomics Clinic to advance treatment options for our patients and we have helped over 25,000 patients and their families with our unique co-located specialists.

### WE CAN PROTECT OUR LEGENDS.

Prostate cancer is the second-most diagnosed cancer in Australian men. There were nearly 20,000 men diagnosed last year. Sadly, it is the second highest cause of cancer related deaths in Australian men.

With education & awareness encouraging regular testing, found early enough, with the right treatment and care, prostate cancer doesn't have to be a death sentence. Australian men, our Aussie Legends can be protected.

#protecting legends

McGrath Foundation raises money to fund McGrath breast care nurses, who provide invaluable support and care to women and men experiencing breast cancer. From diagnosis to treatment, McGrath breast care nurses are available to help individuals and their families for free and with no referral.

McGrath breast care nurses bring you and your family peace of mind through expert knowledge, personal care, and genuine compassion. They can help you create time in your life not defined by breast cancer.

The McGrath foundation funds 185 McGrath breast care nurses in communities right across Australia, and most crucially in regional and rural areas where treatment and support may be hard to find.

- Breast cancer is the most common cancer in Australia.
- 57 people will be diagnosed with breast cancer every day in Australia.
- 90% of patients live within 75km from a nurse.
- It costs \$140,000 to fund a full time McGrath breast nurse for a year, including training and development.
- McGrath foundation's mission is to have 250 nurses by 2025.
- 1 in 7 women will be diagnosed with breast cancer in Australia.

# SILAGE WRAP - ORIGINAL

## Silotite™

Designed for trouble-free use on all balewrapping machinery Silotite is the product of choice for farmers in 50+ countries. Manufactured with SmartStructure technology to ensure all mechanical aspects of our films are optimised, resulting in reliable, stable, high performing films that create ideal ensiling and storage conditions.

- Consistent performance and quality film 70% stretch on round bales
- Trouble-free balewrapping on all machinery
- High puncture and tear resistance
- Fully recyclable
- Suitable for both round and square bales
- Suitable for day and night wrapping

# TROUBLE FREE WRAPPING

# SILOTITE

excellent material science

proactive parameter control

exceptional manufacturing expertise

Quality is not accidental, Silotite and Silotite pro are manufactured within strict quality control systems. Each roll of stretch film is checked multiple times during the manufacturing process to ensure professional contractors and farmers get the best quality film roll. Silotite provides an effective barrier that prevents penetration of oxygen, maintaining quality of silage while minimising spoilage.

\*BASED ON 1.2m x 1.2m bale at 70% stretch

## Triowrap™

Triowrap is a high-performance multi-layered silage film formulated for trouble-free wrapping.

Manufactured in Sweden, Triowrap has been thoroughly tested in Australia and New Zealand making it the silage film of choice for Australasian contractors. Triowrap has been used extensively throughout Australasia for the last 18 years and is used in over 50 countries worldwide.

If you're looking for a trouble-free silage film, Triowrap is the perfect choice. Providing superior strength due to its multi-layer co-extrusion, it's suitable for wrapping both round and square bales. It's also available in 25um and 30um gauges, ensuring you can choose a thickness that's appropriate for your crop. In addition to these benefits, this silage wrap is UV stabilised, making it ideal for use in harsh Australian conditions.

- Multi layered silage film for maximum strength.
- Thoroughly tested in Australia and New Zealand.
- Used in over 50 countries.
- Versatile, suitable for square and round bales.
- UV stabilised
- 70% stretch
- Available in two different thicknesses, choose the correct thickness for your crop.

# SILAGE COVERS & TUBES

## SILACOVER

With 20 years of use in Australia, Silacover is the silage cover of choice for professionals and farmers.

Silacover silage covers are made from high-quality polyethylene co-extruded multi-layer black/white reflective film. Available in two weights, being Heavy Duty and Extra Heavy Duty for application in either finer pasture based or coarser maize type silage.

- Premium quality
- Heavy duty and extra heavy duty gauge to suit your application.
- Impact resistant
- Consistent film thickness
- Minimum 12-month UV protection.

## MAXITUBES

Maxitubes were developed for use in conjunction with PRONOVOST machinery. Maxitubes are manufactured from a three-layer co extruded polythene film, white on the outside to reflect the heat and black on the underside for improving opacity, completely eliminating light transmission to the enlisted product. The tubes incorporate a blend of pure virgin resins extruded at 100 microns for superior strength and UV stability for 12 months protection even under the most severe sunlight exposure.

Developed to be used with PRONOVOST machinery.

CODE	PRODUCT / BRAND	COLOUR	WIDTH / ROLL (M)	LENGTH / ROLL (M)	GAUGE	ROLLS / PALLET
79384645	MAXITUBE	Black / White	1.38 (4'6")	45	100 um	32
79384667	MAXITUBE	Black / White	1.38 (4'6")	67	100 um	28

## BALETITE

Baletite replaces netwrap in round silage bales. Created for balewrappers that can apply film instead of net, Baletite provides an additional air barrier and creates a better bale shape by exerting a tighter grip around the bale circumference. Baletite reduces silage wastage as no baled fodder can become enmeshed in it. Produced from the same material as balewrap means Baletite doesn't have to be separated from balewrap after use. Instead, both films can be recycled together thereby saving time and labour.

- Baletite exerts a tight grip around the bale circumference, with a high holding force so the bale will not expand when the bale is released for wrapping
- Baletite makes the bale easier to open because of its smooth surface, which makes even frozen bales easy to open. Mechanical opening is easy, meaning time savings and no enmeshed fodder
- Baletite is made of the same materials as bale wrap, so no need to separate for recycling

CODE	PRODUCT / BRAND	COLOUR	WIDTH / ROLL (M)	LENGTH / ROLL (M)	GAUGE (UM)	ROLLS / PALLET
59994971	BALETITE	White	1.28	2,400	13	20
59994951	Baletite 'McHale'	White	1.38	2,000	16	20

## TRIOBALE COMPRESSOR

TrioBale Compressor with its unique blend of raw materials can be stretched to an optimum level on round bales. This helps to maintain the bale shape during the storage period resulting in a better silage with a higher density maintained. This will give more kg DM/m<sup>3</sup> and improves handling of the bales.

- Maintains shape provides easy storage.
- Creates an additional air-tight layer resulting in better quality silage.
- 100% recyclable can be recycled together with bale wrap.
- Long 1800m roll length.

CODE	PRODUCT / BRAND	COLOUR	WIDTH / ROLL (M)	LENGTH / ROLL (M)	GAUGE (UM)	ROLLS / PALLET
59985330	TRIOBALECOMPRESSOR	White	1.35	1,800	20	16
59985341	TRIOBALECOMPRESSOR	White	1.40	1,800	20	16

# GRAIN BAGS

Tama Australia is excited to announce we are the proud new distributors of IpesaSILO™ grain bags.

IpesaSilo™ is the longest standing, most recognised grain bag in Australia, and proven to withstand Australia's tough conditions.

With durability and reliability the key requirements for farmers using bags, IpesaSILO™ is the most proven in the market.

With grain storage being the most critical aspect of harvesting efficiency, you need to ensure you can depend on your grain bags to be hassle-free at the time you need it most.

IpesaSilo™ provides the consistent and reliability you need to ensure your harvest is trouble-free.

Choose a bag that is proven in the field.
